**DOUGLAS**COLLEGE

COMMERCE AND BUSINESS ADMINISTRATION
CSIS 1280: MULTIMEDIA WEB DEVELOPMENT
Quiz 1 (October 2, 2020)
(7 % towards your Final Grade)

Code the home page (quiz1.html) for the following website. Place all the CSS in a separate file styles.css

Favicon

- Associate the webpage with the favorite icon: favicon.png

Page Layout:

- Configure a centered page layout with 80% width and a white background

The body element

- Add a style rule for the body element for configuring a CSS gradient with three colors stops #b13b3b, #f5f7f2, #bd7979 as a background image.
- Also, configure a box shadow effect on the body element.
- Configure a font-family property (use a font of your choice).

The header element

- Configure style declarations for
    - centered text having 8px wide dashed **rounded** border of color rgb(114, 81, 38)
    - 10px of padding, background color of rgba(211, 151, 38, 0.3)
    - text shadow effect in the color rgb(145, 99, 99) with a 5px offset.

The nav element

- Configure style declarations for
    - 10px padding, bolded text and a background color of #e3c690
- Code a style rule to prevent the hyperlinks in the nav area from displaying the default underline

The main element

- The image "backgrndimage.jpg" that follows the text content "Great Place to Enjoy Great Food and Atmosphere" should be configured as a background image. The background image should fill the space without repeating. Set the height to be 300px.
- The image "mainimage.jpg" (width 450 & height 300) that follows the text content "Happy Hours: 8 pm to 11 pm Everyday" should be inside the <figure> element and should also have a caption configured using <figcaption>. Don't use <div> element for configuring this image and caption.

The footer element

- Configure declarations for italic, .80em size centered text with .5 em of padding and background color rgba(211, 151, 38, 0.3)

All the images including the favicon must be placed in a subfolder named as images.

All CSS style rules must be placed in one external style sheet only.

You must validate your HTML and CSS files.

Submission:

- Your submission should be a **single zip file** named **Quiz1_StudentID** that contains your entire website. Also include your name and Student ID in the footer section of all your webpages.

Rubrics for Grading:

- 16 - Meeting all the requirements
- 4 - Coding Validation (both HTML and CSS)

Note: Every two non-meeting requirements will incur a loss of 1 mark
